

Implementation date and additional rounds

2016

Tobacco products package coverage and location

Graphic health warnings are required to cover the bottom 30% of the front and 50% of the back of the package. Overall, 40% of the package space is allocated to health warnings.

Misleading information

Misleading descriptors such as 'mild,' 'low tar,' and 'light' and figures for emission yields (including tar, and nicotine) are prohibited from appearing on packages.

Constituents and emissions information

A message is required to display qualitative (descriptive) constituents and emissions information on the right lateral side. However, the content of the message has not been issued.

Special notes

The warnings are generally designated for use on smoked or smokeless tobacco products, although two of the warnings can be used on both smoked and smokeless tobacco products. However, the contents of several of the warnings designated for smokeless tobacco products do not address the specific dangers of smokeless tobacco.

Rotation schedule, history, language, and help for smoking cessation

Kenya has produced one round of graphic health warning labels:

SMOKED TOBACCO		
Round (year)	Number	Size (%) [average—front/back]
R1 (2016)	11	40— 30/50

SMOKELESS TOBACCO		
Round (year)	Number	Size (%) [average—front/back]
R1 (2016)	6	40— 30/50

Warnings within the round are required to be rotated for a period of 12 months. Warning texts must be in English (front) and Kiswahili (back), the principal languages of the country. No quitline phone number or government-sponsored website is required to be displayed on the package.

WARNINGS: 2016
